

Free Professional Development Workshop

Code.org is offering free workshops for K-5 educators and content-area teachers interested in teaching the Code.org elementary school computer science curriculum. The workshop will cover content for three courses and teachers will receive the supplies they need to teach the course at no cost. This workshop will be led by experienced Code.org K-5 Affiliates

Location: Building - SRHM 110
Florida Gulf Coast University

Date and Time: Tuesday, July 11th, 2017 9:30AM-3:30PM

Cost: FREE, lunch provided

Register: <https://studio.code.org/pd/workshops/1780/enroll>

Contact: Keith Jackson
jackson@pd.code.org

For more workshop locations and dates, visit: <http://code.org/professional-development-workshops/>

Code.org is a 501(c)3 non-profit dedicated to expanding participation in computer science education by making it available in more schools, and increasing participation by women and underrepresented students of color. The Code.org vision is that every student in every school should have the opportunity to learn computer programming.

The courses are flexible so educators can tailor them to their class based on their students' developmental level and prior experience. The lessons align to CSTA Computer Science and ISTE standards, and reinforce concepts and skills taught in other subject areas by integrating national Math, English Language Arts, and Science standards.
