WHAT’S NEW AT THE RENAISSANCE ACADEMY

NEW & EXPANDED LEE COUNTY PROGRAMS: Renaissance Academy returns to Ft. Myers at the Collaboratory on Jackson St. in downtown Ft. Myers. The winter/spring 2020 Ft. Myers program appears in a separate program guide so be sure to check our website or ask our staff for a copy. In addition, Renaissance Academy has greatly expanded our program in Bonita Springs/Estero at the Brooks Commons Club. Like the Collaboratory, this first-class facility is open to everyone. For those who can join us at these two locations, we hope to see you there and we will continue to work on additional locations for Lee County residents. If you have any suggestions, we would welcome them.

NEW COLLIER COUNTY LOCATIONS: Renaissance Academy is pleased to announce three new Collier County locations for winter/spring 2020. Longshore Lake in North Naples, Siena Lakes in North Naples and Aston Gardens in North Naples which are open to everyone. We hope you will use these beautiful and convenient new learning centers. Our Longshore Lake program will include lunch following each of the lecture programs.

FREE CLASSES MAKE LIFELONG LEARNING AVAILABLE TO EVERYONE: Typically once a month, the Academy will open its doors to all and offer free classes at the Naples Center. Pre-registration is required. Space is limited. Let all your friends and family know!

PLATINUM AND GOLD UNLIMITED MEMBERSHIPS: Purchase an Annual Platinum Membership for a fee of $1,350 and get unlimited access to all Renaissance Academy lectures, courses, day trips and special events from January 1 – December 15, 2020 (space permitting and excludes travel programs). Purchase an Annual Gold Membership for a fee of $850 and get unlimited access to all Renaissance Academy lectures and courses from January 1 - December 15, 2020 (space permitting and excludes travel programs). For seasonal residents, purchase a Winter/Spring Seasonal Platinum Membership for a fee of $1,000 and get unlimited access to all Renaissance Academy lectures, courses, day trips and special events from January 1 - May 31, 2020 (space permitting and excludes travel programs). Purchase a Winter/Spring Seasonal Gold Membership for a fee of $650 and get unlimited access to all Renaissance Academy lectures and courses from January 1 – May 31, 2020 (space permitting and excludes day trips, special events, Contemporary Art, travel and other programs). Platinum and Gold members are encouraged to register for as many classes as they wish, but registering and not participating is unacceptable. Great logistical planning goes into the execution of our programs. Failure of a Platinum or Gold Member to attend four (4) or more classes will result in the forfeiture of their membership. To avoid this, Unlimited Members must contact us to cancel their registration a minimum of three (3) business days in advance for any programs they cannot attend and seven (7) business days for special events.

ANNUAL AND SEASONAL MEMBERSHIPS: Annual Memberships, valid from January 1 – December 15, 2020, are available for $75 per person and $125 for same-household couples. For seasonal residents who wish to support lifelong learning and enjoy the benefits of Membership, the Renaissance Academy offers a Seasonal Membership program. A Seasonal Membership, valid from January 1 – May 15, 2020, is $55 per person and $95 for same-household couples. Membership fees are non-refundable.

MEMBERS WHO TAKE MORE PROGRAMS RECEIVE GREATER VOLUME DISCOUNTS: Become a Member and enjoy an additional 15% savings on most programs when you register for five (5) or more programs at once. These special volume discounts are available only to Members and exclude Balance University, Bridge, Day Trips & Special Events, Films, Foreign Languages, Great Decisions, In-Depth Seminars, Lectures with Lunch, Mah Jongg, Photoshop Elements, Tai Chi, Yoga, Writing Programs and others. All classes must be registered for at the same time. Substitutions/changes are permissible prior to the start of any class. Programs purchased with volume discounts are non-refundable, but credits for future programming are permitted. Call our offices for more information and to register.

MEMBER DO-OVERS: Wish to repeat a lecture or short course that you have taken at the Academy in the past year? Members may repeat classes while enjoying a 50% discount off the regular Member rate. This does not apply to special and certain other programs. Please call us for more details.

TRY THE FIRST SESSION OF A MULTI-PART COURSE FOR $15: See a course that has several sessions or is part of a series and not certain if you will like it? Try the first session of most multi-session courses for only $15. Not all courses apply. Please call us for more details.

RA is always looking for instructors with talent and ability to lecture. Complete a new course proposal form on our website fgcu.edu/racademy and encourage others to apply.

Discussion with photographs will include Chaco Canyon outliers with geographic implications, Pueblo structure, socio-economic considerations, subsistence practices, turquoise industry, Mesoamerican connections, Chaco road network and population views. **Instructor: Dr. Robert Young**

This lecture will explore the building of the cathedral and the many stories associated with it. Instructor: Carol Jonson

Bernini and the Birth of the Baroque Style in Rome $24 / $29
MP2312 – Moorings Park (South Naples) – January 27 at 10am – 11:30am, Monday

Gian Lorenzo Bernini is credited with being the inventor of the Baroque style in 17th century Rome. His emotional and dramatic sculptures are amazing. HB2313 – Hideaway Beach Club (Marco Island) – February 3 at 1:30pm – 3pm, Monday

This lecture will explore Leonardo’s works with their focus on naturalism as well as on capturing the “moti delle passioni dell’animo,” the emotions and state of mind of his subjects. We will examine how the master’s work influenced artists whose names might not be as familiar to us, including Boltraffio, Luini, Solario, Giampietrino and Melzi. Instructor: Carol Jonson

Donatello – Sparking the Renaissance $24 / $29
AR2314 – The Arlington (Southeast Naples) – February 11 at 2:30pm – 4pm, Tuesday

Donatello was one of the greatest sculptors of the Early Renaissance. His creations, especially two wonderful David statues in Florence, are remarkable for the way he renders figures in motion and with intellect. His work truly embodies the principles of Renaissance humanism with figures who are definite individuals, in contrast to late medieval art with its far more stylized and generalized figures. Instructor: Carol Jonson

Western Landscape Painting $24 / $29
NC2315 – Naples Center (South Naples) – February 19 at 1:30pm – 3pm, Wednesday

Artists have always been fascinated by the beauty of the great outdoors. By the late 1700’s landscapes were being painted through genre and history pictures. By the 1800’s landscapes had become picturesque and were very popular in Europe and America. Landscapes could be idealized or realistic, painted “en plein air” or in the studio. Seascapes developed with the struggle of nations to rule the sea. From the classic perspective of Hobema, the romanticism of Constable to the Hudson River School in America, we will explore this beautiful and popular painting genre. Instructor: Mimi Gallo

LL2316 – Longshore Lake (North Naples) – February 20 at 10am – 1:30pm, Thursday

The Impressionist master, Claude Monet, is one of the world’s most beloved artists. Monet planted gardens wherever he lived, but his masterpiece was Giverny, where he spent more than half of his long and very productive life. The beautiful gardens he created at Giverny were a never-ending source of inspiration for Monet. Join us as we look at photos of the gardens and how Monet translated them into beautiful works of art. Instructor: Carol Jonson

From Mary Cassatt and Berthe Morisot’s mild domestic interiors and portraits to the outrageous and openly confrontational works of modern artists like Tracey Emin and Kara Walker, we will trace the emergence of the female artist. Join us for stories of women barred from art classes, eclipsed by their husband’s fame and overlooked by the art establishment. Yet, they would ultimately become contemporary art’s most sought-after, respected and influential celebrities and innovators. The lectures and participant discussion will follow the journey of self-discovery experienced by women in art and review the changes that took place in art and society over the last two hundred years. **Instructor: Genie Kell**

Naples, Italy in the 1600s was a magnet for artists who found willing patrons in the Spanish viceroys who ruled the area. Among the first of those Baroque-era artists to arrive was Caravaggio, and his naturalistic style created a sensation. His devotees – the Caravaggisti – soon followed. One was the Spaniard, Jusepe Ribera of Valencia. Ribera delighted not only in painting gruesome martyrdom scenes, but also in heading an infamous, ruthless and tyrannical cabal that controlled who would be allowed to paint in Naples. Two of Ribera’s pupils, Salvator Rosa and Luca Giordano became important champions of Neapolitan painting. And a final jewel in the crown of Napoli’s 17th century wealth of artists was Artemisia Gentileschi, a rare female painter. **Instructor: Carol Jonson**

Mural Arts Philadelphia is the nation’s largest public art program, dedicated to the belief that art ignites change. Our core program areas—Art Education, Restorative Justice, and Porch Light—yield unique, project-based learning opportunities for thousands of youth and adults. Each year, 15,000 residents and visitors tour Mural Arts’ outdoor art gallery, which has become part of the city’s civic landscape and a source of pride and inspiration, earning Philadelphia international recognition as the “City of Murals.”

**How to Build a Monument** $42 / $49

NC1928 – Naples Center (South Naples) – February 7 at 11am – 12:30pm, Friday

Monuments operate as statements of power and presence in public space. No longer bound by static representations, we have lived through a sea change around monuments, in which creative communities respond to both triumph and loss, while challenging the legacy of confederate and other problematic representations of memory. No matter how grand the scale, we understand that full accounts of the past cannot fit into a statue, a plaque, or a marker, especially around matters of stories of struggle, equity and collective action. For several generations and counting, artists, activists and students have often led new directions in the field, adding platforms for exchange, accountability, interaction, and catharsis within the monumental form.

Instructor: Paul M. Farber, Ph.D., Artistic Director and Co-Founder of Monument Lab and lectures in Fine Arts and Urban Studies at the University of Pennsylvania

**Designing Museums for Ancient Art** $42 / $49

NC1929 – Naples Center (South Naples) – March 6 at 11am – 12:30pm, Friday

Who owns Antiquity? Who gets to determine how ancient objects are displayed in museums? What is the role of architecture, or more specifically, what is the role of contemporary museum design in how one displays and interprets ancient art? In this illustrated lecture, Thomas Morton will use three case studies (the New Acropolis Museum in Athens, the Neues Museum in Berlin and the Ara Pacis Museum in Rome) to examine how architects are designing museums and, in the process, are wading into stormy seas concerning ancient art and how it is displayed. In addition, Morton will situate the design of museums for ancient art within the context of new museum construction in the last twenty-five years.

Instructor: Thomas Morton, National award-winning architectural educator, from the Department of History of Art and Architecture at the University of Pittsburgh
Weaving Memory: The Art of Sheila Hicks  $42 / $49

NC1930 – Naples Center (South Naples) – April 3 at 11am – 12:30pm, Friday

Drawing on global weaving traditions, art history, architecture and memories of lived experiences, Sheila Hicks (b. 1934, Hastings, Nebraska) has redefined the role of fiber in art. From monumental architectural interventions to her more intimate minimes, Hicks’ singular approach to her medium unites a finely-tuned sensitivity to color, line and texture with a distinct consciousness of how her work responds to and transforms physical space. Hicks has called Paris home since 1964, but her work has taken her across the world, from South America, to Scandinavia, to Northern Africa, to the Indian subcontinent and beyond. Through her travels, Hicks has become an acute observer and weaving is the conduit through which she records and interprets the immense volume of imagery she has encountered over time. Spanning more than sixty years of Hicks’ prolific career, this talk will examine how the artist articulates her views through a lens that is at once global and deeply personal.

How do we best understand Trump’s Foreign Policy through the lens of populism, nativism, or irrationality? $24 / $29  
NC2632 – Naples Center (South Naples) – March 10 at 1:30pm – 3pm, Tuesday  
This lecture tells the story of Constantine the Great and Constantinople, his Imperial Christian “East Rome” on the Bosporos that was to last 1000 years. We feature the Empress St. Helena, her Holy Land pilgrimage and discovery of the True Cross and other relics of Christ’s passion. We follow the rise of Islam and Jihad and the sweeping Middle Eastern and North African rule of the Mohammedan Caliphs. As a result, the newly formed Holy Roman Empire in the West joined the Byzantines during the era of the great Crusades, vainly attempting to take back the Holy Land for Christendom. Meanwhile, the brutal Venetian sack of Constantinople and invasions of Mongol hordes from the East triggered an irrevocable “imperial twilight.”

Not So Trivial Pursuits: The Liberal Arts and the Future of Work $24 / $29

NC2665 – Naples Center (South Naples) – February 21 at 10am – 11:30am, Friday

The rise of AI and robotics is currently prompting intense speculation about “the future of work,” from dreams of dramatically increased productivity to nightmares of a jobless future. Recent publications tell us that professionals now need to be proficient in “future skills” that combine facility in working via technological mediums with strengths in the areas computers can’t easily replace such as creativity, communication and people skills, critical thinking, unpredictability and flexibility. Founded centuries ago on the conviction that the cultivation of thinking, speaking and writing is foundational for an active civic and professional life, the liberal arts may once again find themselves the guardians of the very skills needed to turn artificial intelligence to human purposes. This talk will explore the match between the workplace of today and the liberal arts educational tradition and consider some ways higher education can adapt to prepare graduates for the brave new world of work. Instructor: Dr. Glenn Whitehouse

Ireland – A Sacred Island, Before Christianity $26 / $32

NC2666 – Naples Center (South Naples) – February 24 at 10am – 12pm, Monday

The impression that Ireland was a remote, isolated place in antiquity is outdated. Latest evidence suggests it was part of an active trade network along Atlantic-Mediterranean seaways. During the Neolithic and Bronze ages, the sea was a corridor for trade, communication and beliefs - easier, faster and more economical than overland routes. In a sense, this made ancient Ireland more central and accessible than it is today. The seagoing Irish had cultural affinity and contact with communities along this long seaboard, resulting in; shared maritime heritage, language and beliefs. The nature-centric spirituality which arrived with ancient farmers and traders from the Near East is deep in the Irish DNA. Coming from the same origin, Eastern Christianity was a good ‘fit’ for Irish society. In this context too, the influence of Egyptian Christianity on the early Irish Church is easily understood. Instructor: Alf Monaghan

Plant life, livestock and human lives were severely impacted along with the physical, mental and emotional trauma to the nation. Was the Dust Bowl caused by a severe drought alone or were there also human factors at play, such as ignorance and greed? What role did the federal government and the farmers play in the creation of this ecological disaster and its eventual remediation? Finally, whatever happened to the farmland that was so damaged? Instructor: Dr. Richard Hertzberg

Wandering Scribes and Scholars – Legacy of the Early Irish Monks $26 / $32

NC2689 – Naples Center (South Naples) – March 10 at 10am – 12pm, Tuesday

From ancient times, the Atlantic has been Ireland’s link with the wider world. The arrival of Egyptian monks by sea in the early Christian era had a dramatic impact. The influence of Egyptian monasticism sparked an intense interest among the early Irish for nature, self-sacrifice and exile. The austerity of the desert appealed to their fearsome nature. Like the Egyptians they took to ‘Wandering’ over land and sea, embracing isolation and depravation for communion with nature and its creator. The Irish then carried this form of spirituality into Europe. By saving civilization in a devastated Europe after the fall of Rome, the Irish had an immense impact on the world that later emerged, leaving a lasting legacy far beyond their native shore. This is a story of courage bordering on the insane, of boundless passion for scholarship and learning and of reverence for nature, the earth and all creation. Instructor: Alf Monaghan

The Challenge of Separating Church and State  $24 / $29

NC2695 – Naples Center (South Naples) – March 11 at 10am – 11:30am, Wednesday

Although Thomas Jefferson said the constitution was meant to place a “wall of separation between Church and state,” they are clearly not separate. The motto, “In God We Trust” is on our coins. “Under God” is in our pledge. Pandering politicians work to put prayer back in schools. Courts are kept busy ordering the removal of religious icons from public property, etc. The stifling effect of dogma on freedom can be plainly seen in the world’s “theocracies” – where church and state are one and the same. The numbers of such countries with harsh blasphemy laws has been increasing. Instructor: Dr. Charles Kupchella

Charles I and The English Civil War  
$24 / $29  
NC2705 – Naples Center (South Naples) – March 18 at 10am – 11:30am, Wednesday

English monarchs have long clashed with their parliaments over power and money, but never in so deadly a manner as in the reign of Charles I. This Stuart king, shy and dignified, devoted to his family and with a keen eye for fine art, managed to antagonize his parliament to the point of rebellion. The ensuing civil war saw the division of families, the destruction of property and ultimately the execution of the king. The nation was horrified, yet history hails the civil war as the triumph of parliamentary rule over despotism. Was it? This lecture will examine the confluence of issues and personalities that precipitated the civil war and consider its legacy. Instructor: Nancy Maxwell

Examples and causes of engineering failures of aircraft, ships, bridges and load-bearing structures are introduced and discussed. It is shown that most structural failures are traced to combinations of excessive loads, presence of preexisting defects and inadequate material toughness. A newly created video recording eerily connects works of fiction with real events associated with structural failures; in one instance, the “failure” of a fictional airliner is compared with the failure of the Comet, the first commercial jet aircraft. In addition, the events surrounding the sinking of the fictional Titan passenger liner are compared with the actual catastrophic failure of the Titanic cruise liner. Instructor: Dr. Richard Hertzberg

What Really Caused the American Revolution?  
$24 / $29
NC2713 – Naples Center (South Naples) – March 20 at 10am – 11:30am, Friday

It can be argued that the American Revolution was a conflict over the nature of the British Constitution. The British Constitution is the supreme law of the land, but it is not written down. It is based upon precedent and, therefore, changes over time. When the British Empire grew significantly, London believed that the new empire should be governed by a plan to meet overall British objectives and financial requirements and that the colonists should not be allowed to return to their old ways of governing themselves in their own interests. This effort by London broke a 150-year-old precedent and threatened to establish a new policy of colonial subservience to London. Thus, the colonies fought to resist what they believed were encroachments on their constitutional rights by London and the rest is history. Instructor: Jon Dill

$24 / $29  
MP2739 – Moorings Park (South Naples) – April 22 at 10am – 11:30am, Wednesday  
During the “Age of Enlightenment,” an 18th century movement emphasizing reason, critical appraisal and skepticism, civilized society began to value the search for truth more than unsubstantiated declarations it had been found. Truth emerged as something able to survive rational consideration and critical appraisal. Unfortunately, the “flame” of enlightenment didn’t reach everywhere and even where it did, the light it produced never rose above “dim.” Ignorance, poverty, backward-culture as well as religious dogma and even political ideology retarded the Enlightenment’s advance and caused it to fade. There is ample evidence for the need for another Enlightenment today.

NC2879 – Naples Center (South Naples) – January 30 at 10am – 11:30am, Thursday

For many the music of Ludwig van Beethoven represents some of the finest and most sublime music in the Western tradition. What was it about Beethoven’s music that is “great” and that set it apart from his contemporaries? This lecture will cover several of the composer’s most important works and ones that helped him redefine musical genres. We will begin with an examination of the intimate solo piano works (*Moonlight Sonata*) and the quartets (*Quartet in C# minor*). We will conclude our discussion with the monumental *Symphony #9*. Our focus will be how Beethoven challenged musical conventions and consequently forged a new path in music, one that would greatly impact composers of the late 19th and early 20th centuries. **Instructor: Dr. Thomas Cimarusti**

**Origins of the Classical Symphony** $24 / $29

NC2881 – Naples Center (South Naples) – February 7 at 2pm – 3:30pm, Friday

Have you ever wondered who wrote symphonies before Haydn, Mozart and Beethoven? Who invented it and what brought about its popularity? How and where did the symphony develop? We will also examine how these earlier works influenced the symphonies of the great masters such as Haydn, Mozart, and Beethoven. **Instructor: Dr. Thomas Cimarusti**

**Beethoven and the Piano** $24 / $29

NC2882 – Naples Center (South Naples) – February 11 at 10am – 11:30am, Tuesday

Over the course of his career, famed composer Ludwig van Beethoven completed 32 works for solo piano, many of which are now considered masterpieces in the genre. These pieces, known as sonatas, not only demonstrate Beethoven’s most creative innovations in the piano literature, but they also influenced future composers in the writing for the instrument. This lecture will introduce three of Beethoven’s sonatas, highlighting his musical style while simultaneously introducing participants to Beethoven’s piano works and basic terminology in discussing them. Students are encouraged, but not required, to listen to Beethoven’s *Pathetique Sonata*. The work is easily accessible on YouTube. **Instructor: Dr. Thomas Cimarusti**

NC2880 – Naples Center (South Naples) – February 11 at 1:30pm – 3pm, Tuesday

Next to the symphony, the string quartet became one of the most esteemed musical genres in 18th and 19th-century Europe, so much so that Haydn, Mozart and Beethoven eagerly sought to perfect the genre, completing over 100 string quartets over the course of their careers. What led these musical giants to compose in this more intimate genre and why were the Viennese so obsessed with it? In preparation for this lecture, participants are encouraged (but not required) to listen to Haydn’s *String Quartet in E flat*, Mozart’s *String Quartet in C major*, and Beethoven’s monumental *String Quartet in C# minor*. These pieces can be accessed on YouTube. **Instructor: Dr. Thomas Cimarusti**

**J. S. Bach and the Art of Fugue** $24 / $29

NC2883 – Naples Center (South Naples) – February 18 at 10am – 11:30am, Tuesday

J.S. Bach’s musical style often incorporated one of the most intellectually demanding compositional processes – counterpoint. Simply defined as note-against-note, this style of writing dominated much of the Baroque period and often featured the composer’s prowess in writing overlapping melodies, much like the well-known piece “Row, Row, Row, Your Boat.” This course will investigate Bach’s genius in writing polyphonic works and will offer participants an introduction to the composer and his most famed collection of keyboard works, the *Well-Tempered Clavier (WTC)*. Students are encouraged (but not required) to listen to the following in preparation for class: Bach, *Prelude and Fugue in C minor* (Book I of the WTC). The work can easily be found on YouTube. **Instructor: Dr. Thomas Cimarusti**
NC2884 – Naples Center (South Naples) – February 25 at 1:30pm – 3pm, Tuesday

Throughout music history, music and art have been often intertwined in ways that have created some of the greatest masterpieces in Western Music. How have composers used art as inspiration? How have composers transformed musical language in order to musically replicate artistic styles? This lecture will examine the works of artists and composers associated with Impressionism. We will examine how composers constructed new musical means in order to musically paint a particular artistic style. Our focus will be on Claude Monet (Impression, Sunrise) and Claude Debussy (Prelude to the Afternoon of a Faun). Instructor: Dr. Thomas Cimarusti

Chopin and Poland

We will look at Chopin’s Polish background and how the history of Poland shaped his attitudes towards Poland. We will then look at two particularly Polish genres—the polonaise and the mazurka—and sample Chopin’s music in them. Instructor: Woody Andrews

NC2885 – Naples Center (South Naples) – March 2 at 10am – 11:30am, Monday

A number of composers, from the Baroque period through the 20th century, have written works that audiences and scholars alike refer to as “masterpieces.” This course will focus on J.S. Bach’s Mass in B minor, a work which is often regarded as the culmination of Western Art Music, the masterpiece of all masterpieces. The course will introduce the life of J.S. Bach and examine the ideologies that defined his respective musical period and in turn shaped his compositional style. Our discussion will conclude with defining the term “masterpiece” and why the Mass in B minor is considered such. Students are encouraged (but not required) to listen to the following excerpts which can easily be found on YouTube: Kyrie and Crucifixus from the Bach Mass in B Minor. Instructor: Dr. Thomas Cimarusti

Music and Art: Expressionism: Vincent van Gogh and Arnold Schoenberg

NC2886 – Naples Center (South Naples) – March 3 at 10am – 11:30am, Tuesday

Throughout music history, music and art have been often intertwined in ways that have created some of the greatest masterpieces of the Western world. How have composers used art as inspiration? And how did such composers transform musical language in order to musically replicate artistic styles? This lecture will examine the works of Vincent Van Gogh and Arnold Schoenberg and their relevance to the Expressionistic movement. Our focus will be on how composers constructed new musical means in order to musically “paint” a particular artistic style. Instructor: Dr. Thomas Cimarusti

“**Over There**: Music from the First World War”

NC2887 – Naples Center (South Naples) – March 24 at 1:30pm – 3pm, Tuesday

Throughout World War I, music became a prominent feature on the home fronts and the battlefields: propaganda songs, protest songs, and dance songs saturated mainstream American and European cultures. Popular songs such as *It's a Long, Long Way to Tipperary*, *I Didn't Raise My Boy to be a Soldier*, and *Over There* reflected differing (and often conflicting) sentiments at home and abroad. In addition, in the realm of classical music, the First World War would lead composers to fundamentally challenge the definition of music. This lecture will briefly survey the music of the Great War considering not only its historical context, but also music’s role during and after the war, and the impact the war had on later composers. *Instructor: Dr. Thomas Cimarusti*

**The World of the Italian Castrato**

NC2888 – Naples Center (South Naples) – March 31 at 10am – 11:30am, Tuesday

Arguably one of the most disturbing phenomena in musical history is the rise of the Italian castrato in the 18th-century. Indeed, castrati were often considered the rock stars of their time -- swooning Italian opera audiences with their vocal pyrotechnics. Unfortunately, however, the castrato endured many hardships -- both physiological and psychological. The purpose of this course is to explore the world of the castrato. What gave rise to the use of castrated males on the Italian operatic stage? What motivated parents in leading their own children to such a career? And what brought the end of the castrato tradition? These, and other questions, will be addressed in trying to understand an unusually complex musical phenomenon. *Instructor: Dr. Thomas Cimarusti*

**Introduction to Italian Opera**

NC2889 – Naples Center (South Naples) – April 7 at 10am – 11:30am, Tuesday

Following the birth of opera in 17th-century Florence, Italy witnessed an unparalleled obsession with musical drama for the next three hundred years. Composers such as Gioachino Rossini, Vincenzo Bellini, Giuseppe Verdi, and Giacomo Puccini mastered the genre with works such as *The Barber of Seville*, *Norma*, *La Traviata*, and *Madame Butterfly*, respectively. This course will trace the evolution of Italian opera from its beginnings in Florence through the 19th century, highlighting specific excerpts that represent the masterpieces of the Italian opera tradition. Sessions will consist of lecture, power point presentations, and listening/video examples. The instructor will encourage class discussion and engage attendees with various listening activities. *Instructor: Dr. Thomas Cimarusti*
The Romantic Lied: The Marriage of Music and Poetry in 19th Century Song

NC2890 – Naples Center (South Naples) – April 9 at 10am – 11:30am, Thursday

The romantic song for voice and piano was arguably one of the most important genres in the 19th-century with nearly every composer from Rossini to Puccini trying their hand at it. What was the impetus in writing such songs? What purpose did these songs serve? We will explore songs by Franz Schubert and Robert Schumann, paying particular attention to how composers “married” music and poetry. Students are encouraged to listen to Schubert’s Erkönig before the start of class, which can be easily accessed on YouTube. Instructor: Dr. Thomas Cimarusti

This lecture will discuss the process of taking (in camera) and making (post processing) flower portraits with a painterly impressionistic feel. The props and materials needed will be demonstrated. Participants may register for the series above (NC2826) or for any of the individual lectures below. This course provides a unique and intriguing overview of the universal truths and predictably clear patterns in human history, philosophy and the arts. Dr. Moore uncovers salient lessons of the past through the lens of the “prime evils”: Wrath, Avarice, Lust, Sloth, Gluttony and Pride. While technology has advanced and we have become more ‘civilized,’ societies nonetheless continue “rinse and repeat” cycles of the same old mistakes and disasters. Human nature does not change. The cycles of good and evil, comedy and tragedy, unfailingly repeat. Instructor: Dr. Maxine Moore

Lust and Gluttony $26 / $32

NC2827 – Naples Center (South Naples) – February 11 at 10am – 12pm, Tuesday

This lecture delves into self-gratification addictions and the post-modern surge to full manipulation of minds and markets. We start in 19th Century Europe where the insatiable desire to consume and to possess emerged from great lust for power and worship of “the bottom line.” Secular materialism infiltrated everywhere, even the Catholic Church. We consider the influence of Freemasonry, atheistic Marxism and Naturalistic Darwinism, the latter perceiving our so-called civilization as essentially a jungle where animal viability and durability (i.e. “goodness”) depend not on moral conscience but on keen basic instincts and powerful appetites.

Pride $26 / $32

NC2828 – Naples Center (South Naples) – February 18 at 10am – 12pm, Tuesday

In Scripture, epic and art, Satan is the proud fallen archangel and leader of all the devils. His wings forever fan infernal flames or stir icy winds in the lowest depths of hell. This lecture illustrates evil pride in the twin cultures of Imperial Rome and
Fascist Europe. The Romans pioneered the Fascist playbook; they believed as did the 20th century Axis powers that “we have to create the impression of mastery, eliminating without scruples or hesitation those who do not think as we do.” Fascism does not believe in the possibility or utility of peace. Fascism, the oligarchy of pride, is based on elitist worship of power, a world of superiors (state warlords) and inferiors (pawns and slaves treated as property and typically worked to death).

**Avarice**

$26 / $32

NC2829 – Naples Center (South Naples) – February 25 at 10am – 12pm, Tuesday

Avarice was long stigmatized as an accursed vice, later recognized post-Renaissance as the key to “living the dream” of a utopian, cornucopian society. This lecture begins with a look at the Iberian explorers and venal Italian navigators in New World markets: “the greater the profits, the cheaper the lives.” As a prelude to close inspection of the Conquistadors in the Americas and their maritime bane, the Buccaneers, we will be looking at pre-colonial and colonial West Africa, land of great treasure, tragedy and trafficking. On the northern European stage, we will survey the rise of the rapacious Netherlands and the economic imperialism of their ally, the Hanseatic League.

**Wrath**

$26 / $32

NC2830 – Naples Center (South Naples) – March 3 at 10am – 12pm, Tuesday

This lecture explores the theme of rage and revolution, beginning with religious and historical references to the roaring lion, timeless totem of wrath and resistance. The Egyptians, for example, worshipped Sekhmet, lion goddess of war, “lady of terror” and doomsday rampage. The Romans lionized their legions, making sure every major city was dominated by a Colosseum, slaughterhouses of Roman wrath. Dante pictures the psychopathically violent after death morphed into ugly, screaming animals engaged in pointless combat in the toxic River of Hatred. This lecture will highlight examples from the Protestant Revolt and the French Revolution.

**Sloth**

$26 / $32

NC2831 – Naples Center (South Naples) – March 10 at 10am – 12pm, Tuesday

Renaissance sage Giam Vico wrote that “In most cultures, each stage (the religious and heroic) improves the preceding one, but every third stage (hedonism and narcissism) is always followed by decline, disintegration, decadence, barbarism. The focus of this lecture is that “third stage” and sloth, hallmark of a self-immolating culture. Toynbee’s conclusion that “civilizations die from suicide, not murder” is proven by an overview of classical and modern dystopias, with their trademark myopic pursuits and neutralized perspectives.

**Faith, Science and Reason Bring Meaning to the Universe**

$38 / $45

NC2832 – Naples Center (South Naples) – February 17, 19 at 1:30pm – 3:30pm, Monday/Wednesday

How do we relate to the “real” mysteries of the universe, which will have a direct impact on our future as a species? We will discuss: What will future evolutionary man look like? What is the nature of time and is it an illusion, is it relative and do the past present and future exist simultaneously? Can we travel through time? Are we alone in the universe or is contact imminent – then what? Is space travel for man real or fantasy? Will new paradigms like the Theory of Everything, future revelations and the discovery of alien life affect our world views? Instructor: Scott Flaig

We will study his most famous painting, *The Starry Night* and his emotional, philosophical, scientific insights and theological beliefs behind it. Additionally, we will look at several of his other paintings along with Hubble photos of the cosmos, that when shown with expressive thought, bring incredible insight into the relationship between art, faith, reason and nature.

Homo sapiens is arguably Earth’s most successful species. How did evolution shape our species and position us for our unprecedented success? Where might evolution take us? Where should we go? This question is well worth considering since a) we have some control over human cultural evolution; b) we can direct and have directed the evolution of other species; c) we have already influenced human biological evolution through advances in medicine and in ways more-subtle; and finally d) genetic engineering promises even more direct control. Space and Time Travel: Real or Fantasy? $24 / $29

NC2848 – Naples Center (South Naples) – March 25 at 1:30pm – 3pm, Wednesday

Mankind’s pursuit of exploration seems to be embedded in our DNA. First, we explored the Savannah; then we migrated out of Africa and into Europe, Asia and the far western continents. Then man orbited Earth with moon landings not far behind. So, what’s next - Mars landings, exploration of Venus and then onto the outer planets? When will we go beyond our solar system and into interstellar space searching for a new home? As exciting as these new pursuits are, the space challenges facing our human-ness and the technologies necessary for reasonable travel time must be resolved, or we must accept that local visits to the moon and perhaps Mars will be the end to human space exploration. So, why not travel “through time” and just bring back those technologies that allow us to travel at warp speed? First, that would depend on whether or not the future exists - does it? Philosophers say yes if you believe in eternalism, the simultaneous existence of the past, present and future. If so, then time travel is only a technology problem - but what a huge problem it is! Is space and time travel possible or just a fantasy? Instructor: Scott Flaig
What are the Odds that We Are Alone in The Universe and So What if We Are? $24 / $29

BV2850 – Bentley Village (North Naples) – April 21 at 1pm – 2:30pm, Tuesday

There are more than five-hundred sextillion stars in the universe “…more than all the grains of sand on all the beaches of the world,” according to Carl Sagan. NASA says there are perhaps ten-billion planets in “goldilocks zones” in the Milky Way alone and some 400 billion galaxies in the observable universe. It’s therefore improbable that life didn’t arise elsewhere. The fact that we haven’t heard from anyone doesn’t mean they aren’t out there. We can’t yet settle the question of intelligent life elsewhere in the universe but we can enjoy a lively discussion about the possibilities. Instructor: Dr. Charles Kupchella

Although it has been simplified by reducing the repetition of moves and some of the more difficult kicks it contains the important and traditional characteristics and features of Yang style forms. The short form enables beginners, old and young, to concentrate on, and appreciate, the essential principles of Tai Chi of effortless movement, relaxation and awareness of the mind and body as one. Depending on how fast or slow you like to do your form the whole form takes between 4 and 8 minutes to do. It is said to be the most popular tai chi form practiced today. Instructor: Karen McNeil
