

MASTER OF SCIENCE MATHEMATICS

GRADUATE STUDIES

Program Description

The Master of Science (M.S.) in Mathematics program prepares students for careers in which quantitative agility and problem-solving skills are critical. Small class sizes, the opportunity to conduct research in collaboration with faculty, professional development through conference participation and supporting undergraduate instruction through teaching opportunities afford students a broad range of experiences and training. Typical career paths for graduates include actuarial science, financial analysis, statistical analysis and education on the secondary or post-secondary level.
