

Career paths are not always a straight line.

Dr. Steven Brodie

Vice President, Worldwide Pharma
Services Operations, NeoGenomics

NeoGenomics Laboratories is headquartered in Fort Myers, FL and specializes in cancer genetic testing globally. Our Company provides one of the most comprehensive oncology-focused testing menus in the world for pathologists, oncologists, academic centers, hospital systems, pharmaceutical firms, and managed care organizations throughout the United States, and pharmaceutical firms in Europe and Asia for clinical trials and drug development. We operate multiple CAP accredited/CLIA certified laboratories in Florida, California, Texas, Georgia, Tennessee, Switzerland, Singapore and we are in the process of building a laboratory in Suzhou China for Pharma studies. How can STEM students get into this fascinating field?
