

Department of Mathematics Seminar

In collaboration with: **FGCU** | Whitaker Center for
STEM Education

Date: Wednesday,
March 1st, 2023
2:30 -3:30 pm

Location: Seidler
Hall Room 220

Math on the Simpsons

Speaker: Mr. Jerome Tuttle, Actuary and Data Analyst

The Simpsons cartoon television show is the longest-running American sitcom, with cultural references covering a wide spectrum of society. Nobody watches The Simpsons for the math, right? But there is more math than you may realize, especially when the writers sneak it in quickly with no relevance to the plot. The speaker is an actuary and data analyst who believes math should be fun, and he will present some of the Simpsons' math so that math majors and non-majors can appreciate it.

LIGHT REFRESHMENTS WILL BE PROVIDED
