Teaching Philosophy:
My philosophy for this class is to be the "guide on the side," rather than the "sage on the stage." That is, students must take ownership and initiative in this class, learning from actual experience the process of analyzing individual securities, managing portfolios of assets, and making buy and sell decisions in a dynamic economy. I will help and encourage the class, but I expect students, working individually and in groups, to ultimately determine the strategies used and actions taken to invest and manage the funds allocated in a manner that is consistent with fiduciary responsibility.

**Investment Guidelines (from FGCU Foundation)**

The Finance Committee is a standing committee appointed by the Chairperson of the Foundation and confirmed by the Board. The Finance Committee is responsible for the investment of Foundation assets and for establishing policies and procedures with the concurrence of the Board.

The Finance Committee will, with approval of the Board, retain registered investment advisors to manage the assets. Investments advisors will be selected from established and financially sound organizations, which have a proven and demonstrable record in managing funds with characteristics appropriate for the risk/return profile of the Foundation's assets. The selection process will involve a process which will be determined and fully documented for the Finance Committee's records.

The Finance Committee may from time to time elect to acquire, receive or hold alternative investments (such as real estate, venture capital, etc.) with approval of the Board if it is
determined that such investments will be in the best interest of the Foundation and the University. Such assets will be valued at fair market value. Alternative investments should at no time comprise more than approximately 10% of the total market value of Foundation assets.

**Asset Allocation Policy**

It is anticipated that 60% to 75% of the market value of the total investment pool(s) will be invested in equities; 55% to 70% in a Domestic Equities portfolio and 5% in an International Equities portfolio. It is further anticipated that 15% to 25% of the market value of the total investment pool(s) will be invested in a Fixed Income portfolio. Other Investments will have a range of 5% to 15% and a minimal balance to make anticipated expenditures will be invested in cash equivalent instruments. In order to provide a range for the anticipated mix within which the investment manager can have sufficient operating flexibility, the following targets and ranges shall apply. The Finance Committee approved allowing the equity percentage to exceed 70% if it is the result of appreciation. If equity exceeds 70%, it will be reviewed by the Finance Committee on a quarterly basis. In no case should the equity percentage exceed 75%.

**Fixed Income Portfolio**

Quality/Ratings -- In compliance with the policies established by the Finance Committee, the fixed income manager(s) shall invest in bonds issued by the U. S. Government, an agency of the
U.S. Government, publicly traded corporation or its affiliates, taxable municipal bonds and preferred stock. The market value of bonds issued by any single corporate issuer shall not exceed 10% of the market value of the investment manager(s)' total fixed income portfolio.

In the event that any individual security in the portfolio drops below "BAA" or "BBB", (investment grade) as rated by Moody’s or Standard & Poor’s, the manager(s) shall immediately sell the security.

Duration – The target duration of the fixed income portfolio shall be three to seven years. The Finance Committee shall approve any changes to the portfolio duration.

Permitted Investments – The portfolio shall contain primarily domestic corporate and government notes and bonds, including mortgage-backed securities. Preferred stock and taxable municipal bonds are acceptable investments but are limited to 5% and 30% of the total fixed income portfolio respectively.

**Investment Goals**

**Total Portfolio**

The goal of the total investment pool shall be to achieve a return over the long term (3 years) in excess of a target index. The target index established by the Finance Committee for the investment pool is defined as a 60% investment in the Standard & Poor's 500 Stock Index, a 35% investment in the Barclays Aggregate Bond Index and minimal cash balances in 91 day U.S. Treasury Bills.
**Equity Portfolio**

The primary goal of the foreign equity manager(s) shall be to achieve a return over the longer term (3 years) in excess of that of the Europe, Australia and Far East (EAFE) Index.

**Fixed Income Portfolio**

The primary objective of the fixed income managers shall be to add stability, consistency, liquidity, and safety to the total pool portfolios. The secondary objective shall be total return. Additionally, the investment manager(s) shall strive to achieve a total return in the longer term (3 years) in excess of the return of the Lehman Brothers Corporate/Government Intermediate Bond Index.

**Performance Evaluation**

The investment manager(s) of the Foundation investment pool shall provide quarterly reports for management purposes. The reports shall include data on investments held, returns earned, fees charged, and any other information necessary such as the "net return" calculation for clarification of the investment manager(s)' results.

Upon reasonable notice, the investment manager(s) shall provide any information relevant to the investment pool as requested by the Finance Committee. The investment manager(s) shall notify the Finance Committee immediately, in writing, of any significant change in its management, personnel, methodology or procedures.

The investment manager(s) compliance with all investment guidelines will be reviewed on a quarterly basis. Information is to be provided in the format specified by the Finance Committee. Investment manager performance will be evaluated to determine success in achieving the goals and objectives outlined in this statement. In addition, both the equity and fixed income investments selected by the investment manager(s) will be evaluated to determine risk and consistency of investment style.

In the equity portfolio, consideration will be given to variability and volatility of returns, security diversification and portfolio characteristics (i.e. p/e ratio, dividend yield, average market capitalization and average debt to capital).

In the fixed income portfolio, consideration will be given to variability of returns, as well as average quality and maturity of the portfolio.
