RELEVANT WORK EXPERIENCES

Project Manager, Kaufman Lynn Construction

Effectively managed construction tasks for a \$35 million multi-phased multi-family project. Enhanced the relationship between KL and the client to allow for future business development opportunities. Lead all aspects of a complex, project that was managed through an unconventional contractual relationship. Lead business development presentations on two municipal projects to secure a new line of business for the West Coast division. Lead a \$50M multi-family project with a challenging client. Participated in preconstruction activities, including estimating, preparation of owner contracts and exhibits, securing and filing permits and drafting and issuing letters of intent to secure the financial aspects of projects. Became and FAA Certified UAV Pilot.

Accomplishments and Major Contributions

- Lead a team through all aspects of construction beginning with schematic budgeting
- Promoted to PM Level 2 in 2019 due to superior job performance

Project Manager/APM, DeAngelis Diamond 08/2016 – 09/2017

Effectively managed construction tasks for a \$30 million multi-phased assisted living/memory care project. Projects included complex interior/exterior renovation of a fully-occupied assisted living facility. Established a relationship with a new client for a challenging design-assist project. Lead all aspects of a complex, project beginning with early preconstruction services. Implemented strategies to maintain a project budget that conformed to specific parameters established during schematic design. Managed all aspects of construction processes and met all financial and scheduling project goals. Promoted to project manager after less than one year with the company.

Accomplishments and Major Contributions

- Lead a team through all aspects of construction beginning with schematic budgeting
- Promoted early due to superior job performance

Assistant Project Manager/Project Engineer, Winter Construction 11/2014 – 08/2016

Effectively managed construction tasks for a \$24 million ground-up hospitality project. Established a reputation as a key project team member who was instrumental to project success during a technical, high profile construction project that provided significant value to the company for one of its premier clients. Managed the LEED construction data collection processes that allowed the project to surpass established LEED goals. Surpassed company expectations by building project capacity through enhancing subcontractor relationships. Promoted to Assistant Project Manager in less than 1 year.

Accomplishments and Major Contributions

- Recognized for superior performance via company quarterly awards - 3rd quarter 2015
- Superior performance evaluation June 2014

Support Services Specialist, Defense Contract Audit Agency/FEMA 10/2007- 11/2014

Actively supervised all building construction, renovation, facility operations and space management projects for all eastern region facilities activities in thirteen states across the southeastern portion of the United States. Generated requirements documents for bidding of building design and construction contracts. Created and implemented capital improvement plans for a large data center. Oversaw facilities operations for a large government facility. Championed a Leadership in Energy and Environmental Design (LEED) study for a large federal facility.

Accomplishments and Major Contributions

- Saved the Department of Defense over \$90,000 annually through contract negotiation
- Received cash awards for superior job performance from 2009 to 2014
- Outstanding job performance evaluation from 2008 to 2014
- Employee of the Year for DCAA Eastern Region 2014
