

**Jeffrey D. Stouten, PSM**  
Survey Practice Leader

Mr. Stouten is a Licensed Professional Surveyor and Mapper (PSM) with 20+ years of surveying experience. He has been involved on all levels of numerous projects including large scale municipal, infrastructure, commercial and residential projects throughout the state of Florida. As a third generation registered Florida Land Surveyor, Mr. Stouten draws from a broad knowledge base and diversified business background that serves him well in providing clients with a professional and thorough product. He has served in many capacities in multiple civic and professional organizations including President of the Collier-Lee chapter (2008-2009) of the Florida Surveying and Mapping Society.

## Project Experience

**Florida Power and Light, Multiple Counties, FL** – Topographic and jurisdictional surveys of over 10,000 acres of land for Florida Power and Light throughout several Florida Counties. Provided survey services to establish benchmarks, collect topographic data through traditional methods and aerial LIDAR. Located flagged jurisdictional areas and mapping services.

**Compartment B Buildout and G-435 Pump Station, South Bay, FL** – Survey layout and as-built services to Lodge Construction, Inc. (General Contractor) for 3000+ Acre SFWMD project as part of the Everglades restoration project. Responsible for layout and as-built of canals, levees, and monitoring wells and adjacent pump station.

**Southwest Water Facility (SWWRF) Waterline Extension, Cape Coral, FL** – Survey layout and as-built services to Reynolds, Inc. (General Contractor) for water main to the SWWRF.

**Utility Expansion Project SW4-5, Cape Coral, FL** – Right of Way mapping for Cape Coral Utility Expansion. Survey base mapping for project design for SW 4 and 5 projects as well as all project areas dating back to 1990's. Established horizontal and vertical control and located all pre-existing improvements, generating as-built base maps for project design.

**Florida Power and Light, Multiple Counties, FL** – Boundary & ALTA surveys of over 15,000 acres of land for Florida

Power and Light throughout Collier, Desoto, Hendry, Palm Beach, Manatee, St Lucie and other Counties. Provided survey services to establish parcel boundaries, locate improvements and plot easements and right of ways. Prepared legal descriptions for parcels to be retained or split.

**Entrada Subdivision, Cape Coral** – Design survey services (boundary, topographic and jurisdiction line location), construction layout and as-built of project infrastructure and residential lot surveying services for 721 lot subdivision and nearby condominium project and commercial development site.

**Sandoval Subdivision, Cape Coral** – Design survey services (boundary, topographic and jurisdiction line location), construction layout and as-built of project infrastructure and residential lot surveying services for 900+ lot phased subdivision and nearby commercial development site.

**951 Waterline Expansion Project, Collier County** - Watermain extension along 6 miles of Hwy 951 in Collier County, FL. Provided survey layout and as-built services to Reynolds, Inc (General Contractor).

**City of Bonita Springs** – Provided survey related review services for City of Bonita Springs Community Development Department. Reviewed surveys and plats submitted to City for compliance with Florida Statutes.
