TEACHING

COURSES TAUGHT AT FGCU

BSC 1085C Human Anatomy & Physiology I with lab: First part of a two semester course primarily intended and designed for health science majors. Topics covered include Introduction to Anatomy and Physiology, Cells & Tissues, Integumentary system, Skeletal system, Muscular system, Nervous system, Special senses, and Endocrine system.

BSC 1086C Human Anatomy & Physiology II with lab: Second part of a two semester course primarily intended and designed for health science majors. Topics covered include Cardiovascular system, Lymphatic system, Immune system, Digestives system, Nutrition & Metabolism, Urinary system, Water, Electrolyte, and Acid-base Balance, and Reproductive system.

Honors BSC 1085C Human Anatomy & Physiology I with lab: Scholarly-enriched course taught as part of a First-Year Honors Sequence.

Honors BSC 1086C Human Anatomy & Physiology II with lab: Scholarly-enriched course taught as part of a First-Year Honors Sequence.

NGR 6156 Advanced Anatomy & Physiology I: First part of a two semester course for students in the Master of Science in Nursing Program. The focus is on advanced anatomy and physiology of the human body, with emphasis on the body's homeostasis mechanisms.

NGR 6165 Advanced Anatomy & Physiology II: Second part of a two semester course for students in the Master of Science in Nursing Program. The focus is on advanced anatomy and physiology of the human body, with emphasis on the body's homeostasis mechanisms.
