

## INSTRUCTIONS

### BSW/MSW Field Evaluation

The Field Evaluation form for the Field Placement of your student corresponds to the Learning Plan you and the student completed when s/he began the placement. The Core Competencies and Practice Behaviors are the standards the Department of Social Work use to measure the competency of our graduates. They are based on the accreditation standards of the Council on Social Work Education, our accrediting body.

Please review the learning plan and rate the student on each practice behavior according to her/his demonstration of competency while in this field placement. The scoring rubric is as follows:

- 1 Does not demonstrate competency: Student is unable to perform minimal tasks and does not demonstrate competency in an understanding of the theoretical basis for this practice behaviors.
- 2 Marginal demonstration of competency: Student requires intensive redirection and demonstrates difficulty in achieving required competency for this practice behavior.
- 3 Average demonstration of competency: Student demonstrates an average level of knowledge and ability to meet the basic expectations for competency for this practice behavior.
- 4 Above average demonstration of competency: Student demonstrates an above average level of knowledge and ability to meet the basic expectations for competency for this practice behavior.
- 5 Exceptional demonstration of competency: Student demonstrates an exceptional level of knowledge and ability beyond the basic expectations for competency for this practice behavior.

NA No basis for evaluation: This is used when there was no opportunity for the student to demonstrate competency. There should be few, if any, of these designations.

Each Competency has a space for comments, if appropriate. At the end of the evaluation is space for you, the task supervisor, and the student, to comment on the evaluation.

Evaluation scoring must be completed at the end of EACH semester of Field Education.

Scores achieved on the evaluation have letter equivalents but the final grade assigned will be pass or fail; in order to receive a pass grade, the student must have the equivalent of a C or better (140 or more points).

This evaluation should be submitted to the Faculty Liaison at the time of the site visit.
